Offline

Unite client > Presence Menu

Unite client > Set Location Menu

The login interface for the Unite client by eZuce. It features a light blue background with a large 'U' logo in a speech bubble. The text 'Unite by eZuce' is prominently displayed. Below the logo, there are two dropdown menus for selecting a resource (Available) and a location (Work). A text field for the username 'Martin Steinmann' and a password field with five dots are provided. A checkbox labeled 'Enable Media (Voice/Video)' is checked. A 'Login' button is located at the bottom right.

Additional Admin Configurable Settings:

The resource setting chosen by the user upon login determines the priorities assigned with the different presence states.

The basic rules are:

- The resource with the highest priority at any given time will be the one which receives incoming messages.
- If two or more resources have the same priority, all resources with said priority will receive incoming messages.
- If all connected resources have a negative priority, incoming messages will be queued server-side until one of the resources resets priority to be positive.
- Server side user archive should include all messages and be available to all clients

Unite shall allow for the configuration of different priority for each presence state as an administrator setting (server side setting). A page shall be added to sipXconfig that allows defining Resource names and corresponding priority values.

The default resource names and their priority values are as follows:

- **Home:** Available or Free to chat (40), Away (30), Extended Away (30), Do not Disturb (30)
- **Work:** Available or Free to chat (41), Away (31), Extended Away (31), Do not Disturb (31)
- **Mobile:** Available or Free to chat (42), Away (32), Extended Away (32), Do not Disturb (32)

The admin shall be able to add additional custom resources, rename or delete the default resources and configure respective priorities for the different presence states. [Pidgin hard codes priorities to 1 and 0, for available and away, respectively.]
